

KRATOS DEFENSE & ROCKET SUPPORT SERVICES (KDRSS)

SERVICES AND EXPERTISE

KDRSS provides a range of solutions for complex C5ISR, engineering and operational requirements, and military weapon systems. The Kratos workforce of 3,100+ includes technically-oriented staff, analysts, and engineers with proven skill in the products and programs we support. Our technical experience includes:

- Logistics
- Target Operations Support
- International Programs & Technology Initiatives
- Rocket Program Services
- Advanced Weapon System Research & Engineering

STRATEGIC LOCATIONS, STRATEGIC SOLUTIONS

Our understanding of our client-specific missions and strategic locations enables us to offer more cost effective solutions tailored to clients' requirements, staying consistent with their evolving mission objectives and general challenges. We develop program requirements, support implementation of acquisitions programs, and work with field activities in developing and testing new systems.

Our experience with sophisticated weapon systems allows us to service cutting-edge customers such as Naval Surface Warfare Center (NSWC) Port Hueneme and Dahlgren Divisions, White Sands Missile Range (WSMR), Naval Undersea Warfare Center (NUWC) United States Marine Corps (USMC), Warner Robins Air Logistics Center, Space & Missile Defense Command / Strategic Command, and many others. We also provide Foreign Military Sales to a number of international government clients.

DYNAMIC AND ADAPTABLE PERFORMANCE

With over a decade of involvement in the DOD community, we provide the organizational knowledge and solutions to the most critical programs, on-site and of all classification. Kratos engineers and analysts play a critical role in providing program synergy and reducing the impact on programs during the rotation of military and civilian personnel. Many of our services are ISO 9001:2008 compliant.

KRATOS
FROM STRENGTH TO SUCCESS

The KDRSS Evolving Mission Objectives include the following:

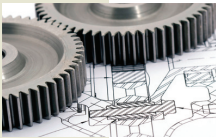

LOGISTICS AND SYSTEM SUSTAINMENT

Alteration & Installation program for submarines & surface ship support at locations such as Pearl Harbor Naval Shipyard
Manufacturing Capability to supporting CONUS & OCONUS customers
Spectrum of Critical Systems Engineering & Sustainment
HAZMAT & Environmental Services
Integrated Logistics Support (ILS)
Operational Logistics Support
Weapon Systems Support
Systems Analysis
Fabrication

AEROSPACE TECHNOLOGY SERVICES

Maintain & Support of Guidance & Control, Electronic Systems, & Sensors
Analysis & Performance Evaluation of Aircraft, Missiles, & Rotorcraft

ENGINEERING, DESIGN, AND ANALYSIS

Engineering, Design, Analysis, & Integration Support Services
Complex System & Subsystem Development & Full Lifecycle Support
Systems Engineering
Rapid Prototyping
Technology Initiatives
C5ISR

ACQUISITION AND PROGRAM MANAGEMENT

Acquisition Support, Planning, & Milestones
Process Re-Engineering & Public Relations
Business & Financial Management
Program Management

RANGE, TARGET, AND FLIGHT OPERATIONS

Support Equipment Maintenance & Repair in Missile Range Facilities & Missile Defense Agencies
Mission Integration, Launch & Recovery Services
Target & On-Range Operations & Maintenance
Equipment Maintenance & Repair
Ballistic Target Development

ACCESS CONTROL AND SECURITY

Control & Security Services
